

Email Action Wizard

This tutorial provides you the information needed to setup an Email action via the notification wizards.

To get to the starting point of this tutorial:

- Log in as administrator
- Click the “Notifications” tab

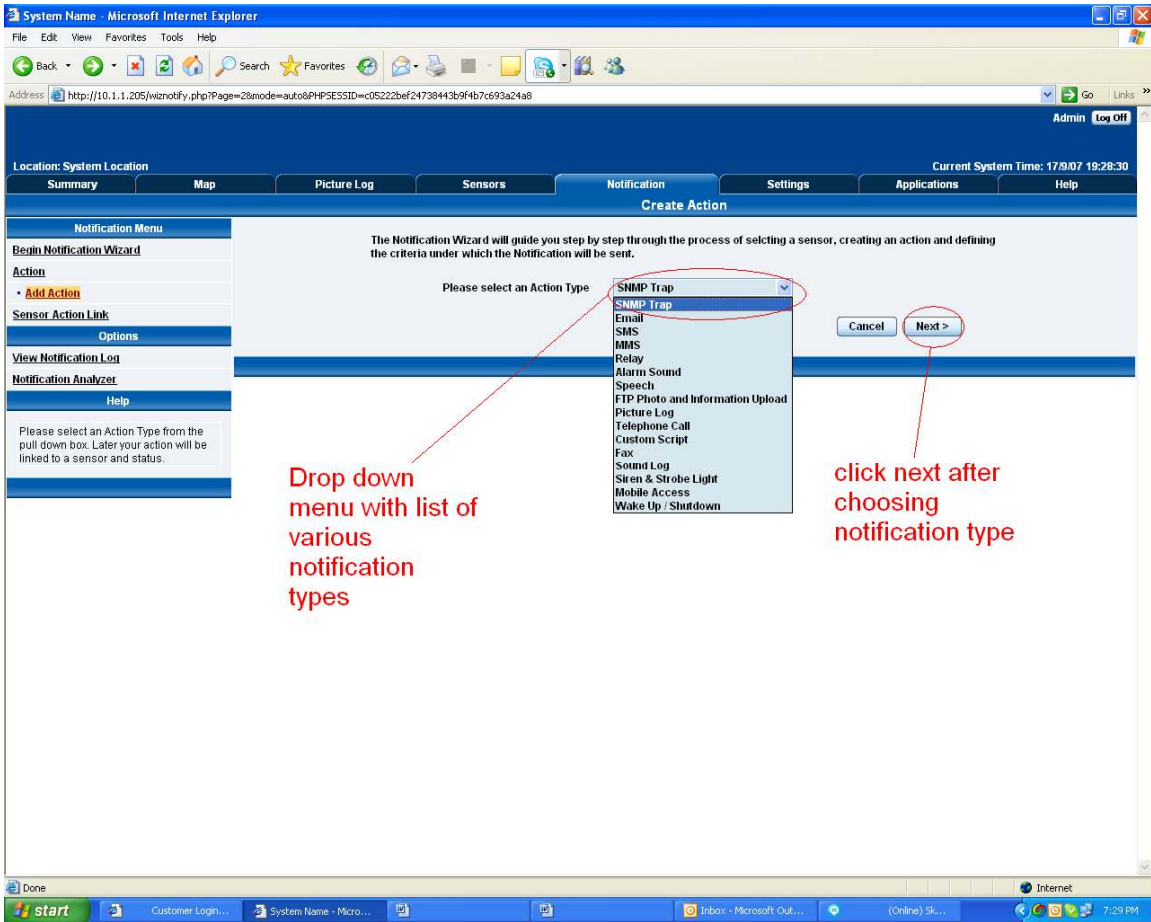

1. Adding a notification

a) First click on the “notification wizard”

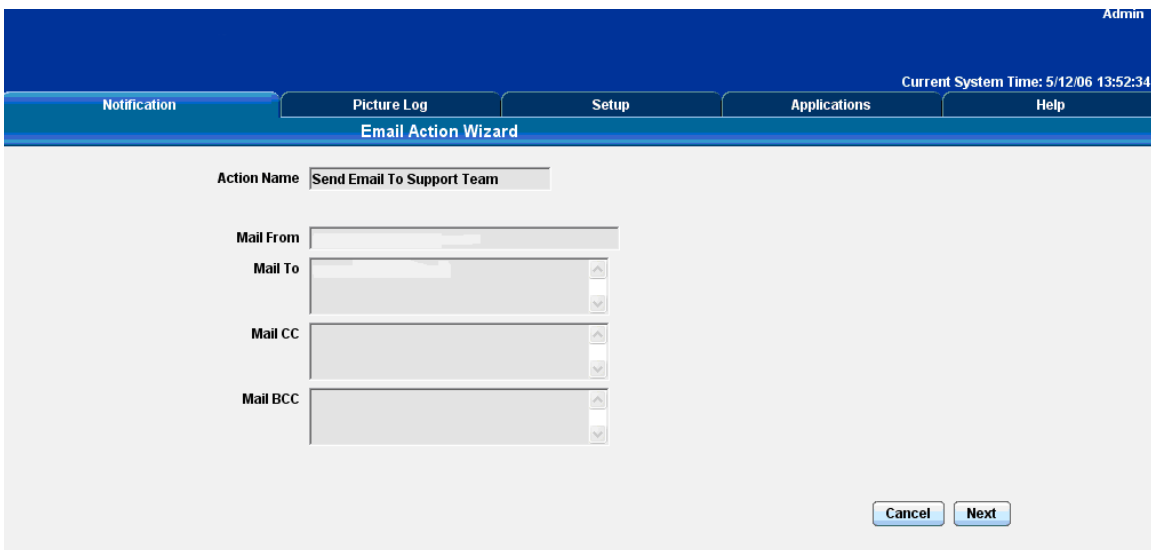

The screenshot shows the Microsoft Internet Explorer browser displaying the enviromon.net web interface. The address bar shows the URL `http://10.1.1.205/wiznotify.php`. The page title is "System Name - Microsoft Internet Explorer". The interface includes a navigation menu with tabs: Summary, Map, Picture Log, Sensors, Notification, Settings, Applications, and Help. The "Notification" tab is selected and highlighted with a red circle and a red arrow pointing to it with the text "Click notification tab". Below the navigation menu, there is a "Notification Menu" section with a "Begin Notification Wizard" link highlighted by a red arrow and the text "Click here to begin setting up a notification". The main content area displays a table of actions with columns "Action Type" and "Action Name". The table lists various actions such as SNMP Trap, Email, Alarm Sound, Speech, and Picture Log. Below the table, there are buttons for "Create", "Duplicate", "Edit", "Remove", and "Test Action". The current system time is displayed as "17/9/07 19:13:36".

Action Type	Action Name
SNMP Trap	SNMP Trap 1
SNMP Trap	SNMP Trap 2
SNMP Trap	SNMP Trap 3
SNMP Trap	SNMP Trap 4
SNMP Trap	SNMP Trap 5
SNMP Trap	SNMP Trap 6
Email	Email 1
Email	Email 2
Email	Email 3
Alarm Sound	Alarm Sound 1
Alarm Sound	Alarm Sound 2
Speech	Speech 1
Speech	Speech 2
Speech	Speech 3
Picture Log	Picture Log 1

b) You will now have the notification wizard page displayed, like below.

c) Select Email from the notification type options.

Please choose a name for your **E-mail Action**. Descriptive Action names increase the simplicity of the system.

Complete the Mail To, From and CC fields with correctly formatted e-mail addresses. The Mail To and From fields are mandatory. Multiple recipients may be entered by separating addresses by a comma (,) or semicolon (;).

Attach Picture

Cancel | Back | Next

Click **Customize** to edit the macro.

A macro is the piece of text that will return data from the securityHawk. For example `$(TIME)` will take the time from the securityHawk and append it to the email.

The **Macro Description** button gives you details of the data the macro displays. At any point during editing of the macro you can click the preview button to see the changes you have made to the message.

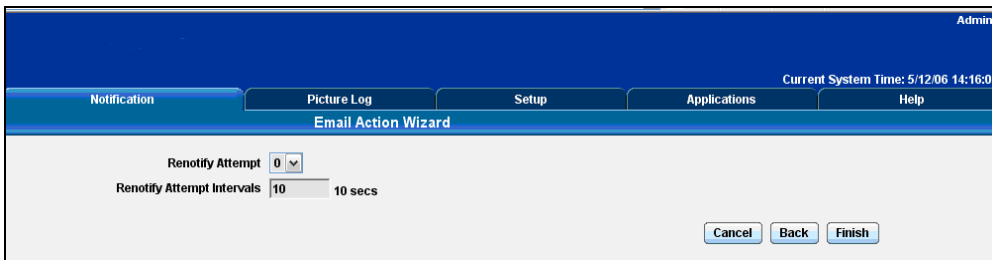

Click **Attach Picture** to attach a Picture with your message. Select to attach either the Current Picture from the Camera or the most recent Picture Stored on the Picture Log. Select which Cameras you would like to use as the source of your picture.

Click **Next** to continue

Enter your SMTP server and Authentication information. If this information has been entered before it will be already completed.

Click **Next** to continue

Define the Maximum number of Times and interval between attempts that an e-mail notification is sent to your recipient(s).

Press **Finish** to Save your Action
